THE BRAND

Founded in 1969 in the heart of Milan, Della Fonte Milano is a historic Italian fine jewelry maison, officially recognized and awarded by the City of Milan as a Historic Boutique for its enduring heritage and artisanal excellence.

For more than half a century, ours has been a passion passed down through generations, a continuous dialogue between skilled hands, precious materials, and a timeless love for beauty.

Each creation is born from an ancient gesture, shaped through care, patience, and the perfection of craftsmanship entirely performed by hand.

Within every jewel lies the essence of an art that transcends time: elegance, harmony, and emotion, captured in a small masterpiece designed to last forever.

EXCLUSIVE SELECTION

For Mint Value, we have created a dedicated selection of Della Fonte Milano jewelry, carefully curated for your positioning and your customes.

The catalogue combines several of our best-selling pieces, timeless icons of our maison, with a selection of design jewels, conceived to bring a touch of originality and contemporary elegance.

The result is a high-impact presentation, offering a wide and harmonious assortment that meets different tastes while enhancing the identity and prestige of your boutique.

GLOSSARY

Reading the price list

- **ct (carat):** The unit of weight for gemstones. 1 ct = 0.2 grams. A 0.50 ct diamond is half a carat.
- **ct total:** The combined weight of all stones in the piece, not the weight of a single stone.
- **Main diamond:** The central, largest stone of the ring.
- **Diamonds around:** The smaller diamonds set around the main stone.
- **D-E/VS:** Shorthand for the diamond grade. The letters before the slash give the colour (D or E), the letters after it give the clarity (VS).
- **D-VS2 / D-SI2:** The exact grade of a single main diamond. The first letter is the colour, the rest is the clarity. One ring can be offered in two qualities at two prices.
- **Approx.:** Approximate. Coloured gemstones are natural, so weights can vary slightly.

Diamond colour

Colour is graded on a scale from D to Z. The closer a diamond is to D, the whiter it is, and the rarer and more valuable it becomes.

Grade	Description
D, E, F	Colourless. The highest grades.
G, H, I, J	Near colourless. A trace of colour visible only to an expert.
K, L, M	Faint yellow tint.
N to Z	Light yellow or brown tint, increasingly visible.

Della Fonte uses only D and E colour diamonds, the very top of the scale.

Diamond clarity

Clarity describes tiny natural inclusions inside the stone, assessed under 10x magnification.

Grade	Description
FL	Flawless. No inclusions or blemishes.
IF	Internally flawless. No inclusions inside the stone.
VVS1, VVS2	Very, very slightly included. Extremely hard to see even under magnification.
VS1, VS2	Very slightly included. Minor inclusions, invisible to the naked eye.
SI1, SI2	Slightly included. Visible under magnification, usually not to the naked eye.
I1, I2, I3	Included. Inclusions may be visible to the naked eye.

Della Fonte diamonds are graded VS, with selected solitaires also offered in SI2 as a more accessible option.

The 4 Cs

The value of a diamond depends on four factors: **Carat** (weight), **Colour**, **Clarity** and **Cut**. Cut covers the proportions and polish that give a diamond its brilliance.

GLOSSARY

Coloured stones

- **Fancy diamond:** A natural diamond with a distinct colour, such as yellow, pink or blue. Unlike white diamonds, a strong, even colour makes it more valuable.
- **Black diamond:** An opaque diamond with a deep black colour, prized for its modern, graphic look.
- **Brown diamond:** A diamond with a warm brown tone, sometimes called champagne or cognac.
- **Sapphire:** A precious stone best known in deep blue. It is the second hardest gemstone after diamond.
- **Pink sapphire:** A sapphire in shades of pink, with the same hardness and durability as blue sapphire.
- **Ruby:** The red variety of the same mineral as sapphire, equally hard and durable.
- **Emerald:** A green precious stone. Natural inclusions, known as the "jardin" (garden), are typical and part of its character.

Ring styles

- **Solitaire:** A ring or earrings set with a single diamond.
- **4 griffes (4 prongs):** Four small metal claws hold the diamond. This lets in the most light and shows the stone at its best.
- **Trilogy:** A ring with three diamonds in a row, symbolising past, present and future.
- **Riviere:** A row of diamonds of the same size set across the top of the ring.
- **Eternity ring:** Stones set all the way around the band, a symbol of never-ending love.
- **Multi-band ring:** Several thin bands joined into one ring.
- **Tricolour intertwined ring:** Three interlocking bands in white, yellow and rose gold.

Other jewellery

- **Choker:** A necklace that sits close to the base of the neck.
- **Flex bracelet:** A flexible, slightly elastic bracelet that slips onto the wrist without a clasp.
- **Heart shape / drop shape:** The cut of the stone. A drop shape is also called a pear cut.

Gold

All Della Fonte jewellery is made in **18-carat gold**, the standard of fine Italian and French jewellery. Each piece is hallmarked **750** on the inside.

For gold, the word carat describes **purity**, not weight. Pure gold has 24 carats. The lower the number, the more other metals are mixed in.

Carat	Hallmark	Gold content	Typical use
24 ct	999	99.9%	Investment bars and coins. Too soft for jewellery.
18 ct	750	75%	Fine jewellery. The Della Fonte standard.
14 ct	585	58.5%	Everyday and mass-market jewellery.
9 ct	375	37.5%	Inexpensive jewellery.

18-carat gold offers the best balance: rich colour, high value and enough hardness to hold diamonds securely for a lifetime.

- **White, yellow and rose gold:** The same 18-carat gold. The colour comes from the metals it is mixed with: palladium or silver for white, silver and copper for yellow, more copper for rose.
- **Carat vs ct:** With gold, carat means purity. With gemstones, ct means weight. An 18-carat gold ring with a 0.50 ct diamond is 75% gold and holds a diamond weighing 0.1 grams.

Ring sizes

Della Fonte uses Italian ring sizes. The chart below shows each Italian size (IT) with its European equivalent (EU) and the inner diameter of the ring in millimetres (MM).

How to find your size: Take a ring that fits you well and measure its inner diameter in millimetres. Find the closest value in the MM column. The European size equals the inner circumference in millimetres, and the Italian size is always 40 lower.

IT	MM	EU
4	14.0	44
5	14.3	45
6	14.6	46
7	15.0	47
8	15.3	48
9	15.6	49
10	15.9	50
11	16.2	51
12	16.5	52
13	16.8	53
14	17.2	54
15	17.5	55
16	17.8	56
17	18.1	57

IT	MM	EU
18	18.4	58
19	18.8	59
20	19.1	60
21	19.4	61
22	19.7	62
23	20.0	63
24	20.3	64
25	20.6	65
26	21.0	66
27	21.3	67
28	21.6	68
29	22.0	69
30	22.3	70
31	22.6	71

Eternity ring prices by size:

- Size 6 to 9: small
- Size 10 to 15: medium
- Size 16 to 20: large

Eternity rings are priced by size, because larger sizes need more stones. If you are between two sizes, choose the larger one.
